

Much of the the economic saving of desktop VoIP comes from the way that any standards based phone can be used on a properly implemented infrastructure, avoiding expensive vendor lock-in.

All of the phones that we sell are tried and tested by ourselves and known to work well in an open environment with other competent SIP implementations. As such, we are able to offer full support and installation assistance should this be required.

Focus on... Aastra

Aastra is a worldwide leading manufacturer of terminals, systems and applications for building and accessing communication networks. Committed to open-standards based solutions, Aastra SIP telephones are all VoIPCortex™ Approved, working well with ipcortex PABX solutions.

business basics - the Aastra 9112i

This is a supremely cost effective basic single line VoIP phone with speakerphone. It offers a flexible, interoperable IP solution that meets VoIP budgets for most applications.

distinguishing features

- Enhanced Call Management - Large storage for personal directory, callers log, and redial list.
- Standards based Integration - Supported for auto-config by our PABX hardware and for multiple other IP telephony systems including BroadWorks®, Nortel, Sylanro, and Asterisk SIP.
- Excellent Audio - Quality speakerphone with excellent voice delivery. We really haven't found another phone which is this good anywhere near this price-point.
- Personal directory
- Call forward, Call transfer & Call waiting
- Caller and calling line information
- Callers log
- Redial list
- Live dial pad or pre-dial support

the classic - the Aastra 9133i

The 9133i VoIP phone is fully supported for auto-configuration by our PABX hardware. It is an advanced, fully featured multi-line VoIP phone that takes full advantage of VoIP technology by offering a flexible, interoperable solution at an affordable price.

distinguishing features

- Power over Ethernet support - Powered centrally (requires PoE switch, or PoE midspan injector to operate).
- Enhanced Call Management - Large storage for personal directory, callers log, and redial list.
- Standards based Integration - Supported for auto-config by our PABX hardware and for multiple other IP telephony systems including BroadWorks®, Nortel, Sylanro, and Asterisk SIP.
- Multiple Line/Call Appearance Lights. Support up to 9 simultaneous calls. Juggle multiple calls easily with a single press of a button.
- Excellent Audio. Quality speakerphone with excellent voice clarity and delivery.
- Less Wiring. Built in dual 10/100 switched Ethernet ports let you share a connection with your computer. Inline power support eliminates the need for a power adapter.
- Personal directory
- Call forward, Call transfer & Call waiting

Delivering reliable voice and data...
